D. "What steps can ordinary people take to help to protect wildlife in your country?"

It is generally agreed today that probably there is no such person on the Earth who would not know the simple truth: nature is our home and the future of all mankind depends largely, if not completely on what happens to it.

The first thing that needs to be said is that wildlife protection is a global task the importance of which no one questions.

In my country there are many different steps which ordinary people can take to help to protect wildlife. Firstly you can save resources we don't even notice how many resources we waste every day, but saving electricity and water isn't so difficult. It is enough to turn off household appliances and lights when they are not needed. Also don't leave chargers plugged into an outlet - they consume electricity even when not in use.

Secondly, it is monitor nutrition. Choosing the right products will help reduce your personal environmental footprint. You should buy seasonal products and locally produced goods. Their delivery requires less fuel and produces fewer harmful emissions. Besides, the more the product has been processed, the heavier its eco-footprint. Semi-finished products and canned food are considered the most "heavy".

What is more, another problem of products is their packaging. According to fact that 561 million tons of food packaging are thrown out in the oceans every year. Therefore, give preference to products in paper packaging and take thermos bag with you to the store. This way you won't keep only fresh food, and save money on packages, but also reduce the amount of garbage.

Thirdly you should collect garbage separately. We can't ignore the fact that people have lear-

ed to deal with garbage in 3 ways: leave it in
landfills, burn it or recycle. ^{en-008} All methods, except
recycling, destroy nature and are dangerous to
human health. That's why separate garbage col-
lection is so important, so that everything that
can be recycled into new things or materials.
For example, you can make new notebooks and
paper for the office from unnecessary waste pa-
per. It is clear from these observations that you
can use special recycling containers that are
stacked on top of each other. You can separate
plastic, glass, paper already before handing over
the garbage.

In conclusion, I can say that everything you need
is start with yourself. We all need to understand
that it is necessary to protect wildlife and increa-
se the natural resources of our homeland - Kazakh-
stan. The issue of nature protection is in the first
place, along with other important issues in the
world. We have to take care of minimizing waste,
as well as ensuring the continued existence of
endangered animals and increasing the popu-
lation.

8. Do young people today make good use of their free time?
The theme of "free time" is one of the most popular topics in all time, especially now when we live in XXI century. So there appears the question: "Do young people today make good use of their free time?"

To my mind, young people use their free time really well and try to be productive all time. How I said earlier, we live in XXI century. Therefore, we have lots of possibilities to spend our leisure time how we want to thanks to time-keeping devices. That's why younger generation don't need to waste their free time on doing household chores, for instance, or making daily operations nowadays.

Moving on, that's not a secret that now teenagers are very clever and ambitious. They put their career on the first place and do their best to achieve aims. And that doesn't even need to be proved, just open the google. In addition, young people understand that without working hard you can't be successful, rich or even popular. Of course, not for all people these things are significant, but our society made it so. So that's why approximately everyone thinks that being wealthy and famous is vital component of life.

Likewise, there are many hobby-sections nowadays. And their numbers are increasing every year. But the main question is "Why?" The reason of this is that young people started to attend them more and more. For example, I made a static with all figures and calculated how many hobby-sections there was last year and this year in our country. In 2020, there was about 230 sections, but in 2021, their number increased and now we have 310 such studios. I think it explains

that young people make good use of their free time.

en-009

To sum up, it's important to notice that
 how many people - so many opinions. However,
 I'm sure that younger generation will
 develop our world in a good way. I believe
 in them!

Do young people today make good use of their free time?"

Comments

Do young people today make good use of their free time? It is a good question. Time is a gold. We have 1440 minutes for a day. So we need to care about our free time.

Nowadays, we have a lot of activities like play an instrument, learn new languages or learn new skills.

In my opinion, teenagers spoils their free time on social networks or on video games. Suddenly, they may have problems with their physical health. Believe it is a few percent.

Because today we have a great teenagers there are Daneliya Tulesheva. She is a singer who has a great voice. And I appreciate her because she had shown Kazakhstan in a good sides. Also I spent my free time with benefits. I play Kobyz in my free time. It gives me motivation when I play masterpieces that I really like. Also I reduce stress when I play a kobyz. I think I spent time with a lot of opportunities.

In conclusion, I can say that young people make good use of their free time.
